

RUSSOUND A-BUS HUBS

The A-BUS Hub is the central connection point for your audio sources and the A-BUS amplified keypads and volume controls. It is the “brains” of the system and never needs to be touched after it has been hooked up. You can choose from several hubs, depending on the number of sources and rooms in your system.

The only wire needed between a hub and a keypad or volume control is a single CAT-5 wire (phone wire may or may not be CAT-5). This wire carries audio signals, control signals, and DC power.

A-LC2 local source connection

RUSSOUND SOURCES

Russound SMS3 smart media server

Russound ST2-XM smart dual tuner

Connect the audio output of any source component (CD player, tuner, etc.) to your A-BUS hub. Or connect your existing A/V receiver and gain access to its connected sources.

Founded in 1967, New Hampshire-based Russound is a global leader in AV solutions that set the standard for performance and ease of use.

RUSSOUND A-BUS CONTROLS

Russound A-BUS A-KP2 amplified keypad and A-KPRC handheld remote control

Russound A-BUS A-VC2 amplified volume control

The keypad provides buttons for on/off and volume, as does the remote control, which you simply aim at the keypad. The volume control adjusts volume for the selected source. Both the keypad and the A-BUS volume control contain an amplifier that powers a pair of speakers.

RUSSOUND A-BUS ACCESSORIES

- The A-LC2 allows you to add an independent “local” source in any room. When the source is turned on, it automatically overrides the main system source and plays through the speakers in that room.
- The A-MSS provides a cost-effective method of adding up to four selectable audio sources to a new or existing A-BUS single-source/multi-zone whole house system.
- The A-LRC1 operates all A-BUS functions and is programmed to operate many brands of A/V equipment. It can also “learn” from your other remotes, providing complete system control.

RUSSOUND SPEAKERS

Russound Advantage® in-ceiling/in-wall speakers

Russound OutBack outdoor speaker

Russound offers a variety of indoor and outdoor speakers for use with your A-BUS system. The speakers are wired directly to the amplified A-BUS keypad or volume control in that room.

Enjoy music throughout your home – conveniently and affordably.

Simplicity at its best.

LET THE MUSIC FIND YOU

Wherever you are, there can be music. Or sports. Or news. With a Russound A-BUS system, you're always close to music.

AT A TOUCH

Thanks to the simple keypad and remote control, you'll always push the right button. Music is just a touch away.

HEARD, NOT SEEN

With amplified keypads as inconspicuous as a light switch, your A-BUS system is everywhere, yet never intrudes on your space.

EASY TO CHOOSE

Start small. Or big. Russound A-BUS systems are modular, so it's easy to enhance or expand your system to match your exact needs.

EASY TO OWN

Whether in a new or existing home, the simplicity and reliability of Russound A-BUS systems ensures hassle-free enjoyment.

FOR LESS THAN YOU THINK

What you might spend on a stereo system for one room can instead give you sound everywhere. And be easier to use. And easier to live with.

THE MOST ELEGANT SOLUTION FOR MULTI-ROOM AUDIO

A-BUS is the easiest way to enjoy music throughout your home. Best of all, it is designed for exceptional ease of use, so you don't just *get* music, you get to *enjoy* music. With the help of your Russound Authorized Installation Specialist, designing the perfect A-BUS system is as easy as **1-2-3**:

- 1** Your Installation Specialist will help you decide where to place amplified keypads.
- 2** Together with your installer, determine the type and location of speakers and where to place them for best acoustic performance.
- 3** Once your Installation Specialist has designed the system, simply turn it on and go directly to music.

To find an installer near you, visit www.russound.com or call (800) 638-8055.

OPERATING YOUR A-BUS SYSTEM

An A-BUS system is easier and more convenient to operate than any stereo system you've ever owned. The award-winning A-KP2 keypad features an on/off button and volume up/down buttons, which are duplicated on the convenient A-KPRC remote control. In a single-source A-BUS system, that's all you need to know.

In a multi-source system, you can select among multiple music sources using the Russound A-LRC1 remote control or your existing system remote. Just aim at the A-KP2 keypad and make your choice!

A Russound A-BUS system really is an investment in living – one that the whole family can enjoy everyday.

The Russound A-KP2 amplified keypad responds to a touch or takes commands from a handheld remote, the A-KPRC.
