**You choose your comfort, we provide the technology**

*No need to install hi-fi sets in every room of your home any longer. With its Allegretto line Niko offers you the solution to segment your favourite music into several rooms of your home or office using one central stereo set.*

*Simple to control, finished in fine style, wireless or linked to your home automation system.*

## Catering industry

Catering establishments containing a restaurant, a café as well as a conference room are in need of sound equipment which can control the music locally. This is now possible with the new Allegretto audio system.

## **Shops**

Submerge the customer in the right atmosphere as to the interior, lighting and ... music. With this new audio distribution system, a shop can be divided into different zones with the appropriate atmospheric music and sound intensity. In case of larger shopping complexes, intercom functions can be used.

# **Basic version**

*The music is set in one central place. A universal remote control and built-in infrared receiver is used in the A44 or A88 audio distribution system. With the presets you can activate pre-programmed settings in an instant.*

*You only need to provide loudspeaker cables for the different zones or rooms.*

## Home

Salsa music in the kitchen, romantic background music at the fireside, your favourite radio channel in the bathroom etc. You only need to use one central audio set with separate controls.

## Comfort version

*Local music control with simple and elegant wall controls. Turn on the music, select an audio source and adjust the volume, in a simple and intuitive way. You can also use presets (pre-programmed audio settings) and in this way activate the right setting by just pressing one button.*

### Companies

The music in the production department will differ completely from the one in the offices or at the reception, as far as the choice and adjustment is concerned. This can now all be controlled via one local operating panel. By linking PA-amplifiers to the A44 or A88, a large amount of loudspeakers can be connected and selective or general intercom applications in one or several zones are possible.

## Home

The A44 or A88 is not controlled by big operating panels, but by a user-friendly and inconspicuous wall device. You choose the colour and finish in accordance with the design of your home. If your present interior should not allow any structural alterations, you can use the wireless models to operate the A44 or A88. With flush mount loudspeakers, the audio installation is completely integrated into your home, without losing sight of the design.

# Integrated version

*By simply pressing one button, an entire atmosphere can be created. You can dim the lighting, close the roll-down shutters, adjust the room temperature and... listen to your favourite music. This is just one example of a complete integration of the A44 or A88 audio distribution system in a Nikobus installation. In addition to controlling the system with the IR remote controls and wired wall push-buttons you can also operate it with RF (radio frequent) control panels and remote controls.*

## Conference room

Modern conference rooms are increasingly equipped with the latest audio visual techniques. Automatic systems are often used for this purpose to allow a simple control of the system. Audio adjustment is also an important factor: playing a company video will require other audio settings than the audio conference system.

## A44 HOME

**Reference: 16-700**

Audio distribution system for directing 4 different audio sources into 4 different zones. Built-in stereo amplifiers for the connection of 4 to 8ohm loudspeakers. Microphone connection provided. Finished with a brushed aluminium 6mm front, lit stand-by-button and blue zone LEDs. Controlled with Niko's push-buttons via the Audio-Link (05-205).

**Pack: 1**

### Characteristics:

- 4 stereo line inputs (connection of audio sources such as tuner, CD etc)
- 4 stereo line outputs (link with external amplifiers)
- Balanced microphone input for dynamic microphones
- 4 built-in stereo amplifiers 2 x 20W/4ohm per channel
- Built-in infrared receiver
- Link with RS232, RS485, binary switch-input and infrared input

**Installation example 1, 2, 3, 4: p. 20-21**

## A88 HOME

**Reference: 16-701**

Audio distribution system for directing 8 different audio sources into 8 different zones. Built-in stereo amplifiers for the connection of 4 to 8ohm loudspeakers for the first 4 zones. Microphone connection provided. Finished with a brushed aluminium 6mm front, lit stand-by-button and blue zone LEDs. Controlled with Niko's push-buttons via the Audio-Link (05-205).

**Pack: 1**

### Characteristics:

- 8 stereo line inputs (connection of audio sources such as tuner, CD etc)
- 8 stereo line outputs (link with external amplifiers)
- Balanced microphone input for dynamic microphones
- 4 built-in stereo amplifiers 2 x 20W/4ohm per channel for the first 4 zones
- Built-in infrared receiver
- Link with RS232, RS485, binary switch-input and infrared input

**Installation example 1, 2, 3, 4: p. 20-21**

## A44 19"

**Reference: 16-702**

Audio distribution system for directing 4 different audio sources into 4 different zones. Built-in stereo amplifiers for the connection of 4 to 8ohm loudspeakers. Microphone connection provided. Finished with a front for mounting in a 19" rack. Controlled with Niko's push-buttons via the Audio-Link (05-205).

**Pack: 1**

### Characteristics:

- 4 stereo line inputs (connection of audio sources such as tuner, CD etc)
- 4 stereo line outputs (link with external amplifiers)
- Balanced microphone input for dynamic microphones
- 4 built-in stereo amplifiers 2 x 20W/4ohm per channel
- Built-in infrared receiver
- Link with RS232, RS485, binary switch-input and infrared input

**Installation example 1, 2, 3, 4: p. 20-21**

## A88 19"

**Reference: 16-703**

Audio distribution system for directing 8 different audio sources into 8 different zones. Built-in stereo amplifiers for the connection of 4 to 8ohm loudspeakers for the first 4 zones. Microphone connection provided. Finished with a front for mounting in a 19" rack. Controlled with Niko's push-buttons via the Audio-Link (05-205).

**Pack: 1**

### Characteristics:

- 8 stereo line inputs (connection of audio sources such as tuner, CD etc)
- 8 stereo line outputs (link with external amplifiers)
- Balanced microphone input for dynamic microphones
- 4 built-in stereo amplifiers 2 x 20W/4ohm per channel for the first 4 zones
- Built-in infrared receiver
- Link with RS232, RS485, binary switch-input and infrared input

**Installation example 1, 2, 3, 4: p. 20-21**

## AUDIO-LINK NIKOBUS

## Reference: 05-205

This DIN-rail module enables a link with the Nikobus controls and the A44 or A88. The control buttons are linked to the Audio-Link with only 2 bus-wires. The A44 or A88 is linked to the Audio-Link with a serial cable. The entire configuration, e.g. linking an audio function to a control button, can be carried out via the 3 buttons and the built-in LCD-screen.

The following audio functions can be linked to a control button:

- Selecting an audio source (1 to 8)
- Skip source (choosing the next source using only one button)
- Selecting the microphone input
- Volume higher/lower
- Zone on/off
- More/less high tones
- More/less low tones
- Balance left/right
- Activate presets

## General characteristics:

- LCD-screen containing 2 lines of 16 characters for programming and status display
- 3 buttons for configuration and retrieving status
- 2 inputs for connection of Nikobus
- 6 digital inputs for controlling audio via voltage free contacts
- 230V connection
- RJ12 connection for connection of A44 or A88 with supplied cable
- Cover 4TE for DIN-rail mounting

Pack: 1

Installation example 2: p. 20

## PUSH-BUTTONS

## 4 key push-button

## Reference: 05-064

This push-button can be used to control 4 audio functions of the A44 or A88, including zone on/off, source selection and volume higher/lower. The used functions are programmed in the Audio-Link.

Pack: 1

A set of audio indication has to be ordered separately.

Installation example 2: p. 20

## Finishing set: 2 x 1/3 button + name plate

Cream	White	Black	Titanium	Graphite	Bronze	Sterling	Cobalt	Sepia	
12-060-03	32-060-03	02-060-03	44-060-03	45-060-03	46-060-03	47-060-03	48-060-03	49-060-03	

Pack: 10

Pack: 10

## 4 key push-button with IR receiver

## Reference: 05-085

This push-button can be used to control 4 audio functions of the A44 or A88, including zone on/off, source selection and volume higher/lower. The used functions are programmed in the Audio-Link.

In addition, it has an IR receiver built-in, which is to be used with the IR hand held transmitter 05-088 or with the universal remote control 05-090-10. The infrared receiver can only be used with Nikobus commands and to control the audio functions of the A44 or A88. This is not like controlling audio sources, as is the case with 'play' on a CD-player etc.

Pack: 1

## Finishing set: 2 x 1/3 button + blank name plate

Cream	White	Black	Titanium	Graphite	Bronze	Sterling	Cobalt	Sepia

Pack: 10

### NAME PLATE WITH AUDIO INDICATION

#### Reference: 16-710-01

4 sheets with pre-printed audio functions for the use of the 4 key control buttons. One sheet consists of 3 different colours of name plates (black/white, white/black and grey/black).

**Pack:** 10

#### Reference: 16-710-02

idem with 16-710-01, but equipped with an IR-receiver.

**Pack:** 10

### PUSH-BUTTONS

This push-button can be used to control 8 audio functions of the A44 or A88, including zone on/off, source selection and volume higher/lower. The used functions are programmed in the Audio-Link.

**Installation example 2:** p. 20

#### 8 key push-button

**Pack:** 10

## CIRCUIT BOARDS

The circuit board contains all electric and mechanic facilities in order to connect one or several push-buttons with the bus. The circuit board is built on a single standard flush mounting box for horizontal screw fixing. For any further mounting of multiple cover plates, you do not need additional flush mounting boxes.

**Connector:** 4 pin (8 pin for 05-012-50)

**Mounting push-button:** with 1 central screw, p.22

**Wall mounting:** by means of screws or a set of claws.

**User manual:** [www.niko.be](http://www.niko.be)

## 4 ZONES CONTROL KIT

**Reference:** 16-730

This kit consists of components to control 4 zones.

- 1 x 05-205 Audio-Link
- 4 x 05-011 Circuit board
- 4 x 05-010 Claw fixture
- 4 x 47-078 8 key push-button in Sterling
- 4 x 47-088-01 Central plate in Sterling with audio indication

The flush surround plates can be ordered separately. Choose your colour and finish from the da Vinci or Cirio line.

**Installation example 2:** p. 20

## RF FITTINGS

### MODULAR RF INTERFACE

**Reference:** 05-300

**Pack:** 1

**Dimensions:** 4 DIN

**Weight:** 225g

This DIN rail RF (radio frequent) module allows the Audio-Link to be used with the RF wall mounted or hand held transmitters or the Nikobus home automation system in general. This way, all audio functions of the Audio-Link can also be used without any wiring.

The RF interface comes with a 230V power supply. 2 terminals are provided, which connect the RF interface with the bus. There is also a connector for connection of an external antenna (05-309).

## RF FITTINGS

### EXTERNAL ANTENNA

**Reference:** 05-309

**Pack:** 5

You need this antenna when the modular RF interface is built into a metal distribution box. This product is supplied with a 3m connecting cable with connector.

## MULTIPLE RF WALL MOUNTED TRANSMITTER

**Control buttons:** 8

**Transmitter range:**  $\pm 30\text{m}$  in building,  $100\text{m}$  in open field

**Dimensions:** L 70mm x W 50mm x D 10mm

**Weight:**  $\pm 30\text{g}$ , including battery

This wireless wall push-button can be used to operate 8 audio functions of the A44 or A88, including zone on/off, source selection, source selection 1 to 4 and volume higher/lower. This RF wall push-button has to be used in combination with the Audio-Link (05-205) and the RF interface (05-300). The appliance is fed by a supplied battery. It can be mounted by means of gluing or screwing. The central plate has to be ordered separately.

## RF hand held transmitter

### Mini hand held transmitter for operating 4 zones

**Reference:** 05-310-02

**Pack:** 1

**Transmitter range:** approx.  $30\text{m}$  in building,  $100\text{m}$  in open field

**Dimensions:** H 119mm x W 57mm x D 25mm

**Weight:** approx 54g, battery not included

This RF transmitter can be used to operate 4 different zones of the A44 or A88. First select the zone, using the numerical buttons. Subsequently, with the additional control buttons, you can turn the zone on or off, select a source or adjust the volume.

There is also a visual control of the operation via the LED. This hand held transmitter has to be used in combination with the modular RF interface 05-300 and the Audio-Link 05-205. Before using the RF transmitter, its buttons have to be configured in the Audio-Link.

Batteries are not supplied (2 x 1.5V, type AAA-LR03).

## WIRELESS CONTROL KIT (RF)

## Reference: 16-731

This kit contains components that enable a wireless operation in 4 zones.

- 1 x 05-205 Audio-Link
- 1 x 05-300 Modular RF interface
- 4 x 05-305-47 8 key RF wall mounted transmitter in Sterling
- 4 x 47-088-01 Central plate in Sterling with audio indication
- 1 x 05-310-02 Allegretto RF hand held transmitter for 4 zones

The flush surround plates can be ordered separately. Choose your colour and finish from the da Vinci or Cirio line.

**Installation example 3:** p. 21

## IR HAND HELD TRANSMITTERS

## 4 channels, 4 control buttons

## Reference: 05-088

Pack: 1

**Control buttons:** 4 x 4

**Power supply:** 2 batteries 1,5V type AAA-LR03

**Nikobus user manual:** [www.niko.be](http://www.niko.be)

This IR hand held transmitter can only be used in combination with the push-buttons with IR receiver (05-085). This IR hand held transmitter can be used to control 4 different zones with 4 audio functions. A total of 16 audio functions can thus be programmed. Before first use the buttons of the hand held transmitter have to be configured in the Audio-Link. The IR rays remain confined to the room in which the remote control is used.

## PRONTO UNIVERSAL IR REMOTE CONTROL WITH TOUCH SCREEN

## Reference: 05-090-10

Pack: 1

**Control buttons:** 10 x 30 for Nikobus, application for A44 or A88 and additional buttons for TV, video and satellite.

**Power supply:** including rechargeable batteries

**Nikobus user manual:** [www.niko.be](http://www.niko.be)

The IR universal hand held transmitter Pronto is prepared for e.g. the A44 or A88 audio distribution system. Via the built-in IR receiver in the A44 or A88 all zones can be operated. Select the zone you wish to adjust and choose a source, change the volume etc. You can also use the memory functions of the A44 or A88. A global setting for all zones can be saved in the memory or activated via the Pronto. The remote control is equipped with a touch screen and it can also be programmed for all common TV, video, audio and satellite equipment. Several appliances can be operated with this remote control.

**Installation example 1:** p. 20

## PRONTO CORRESPONDING CHARGING STATION

## Reference: 05-090-11

Pack: 1

**Power supply:** including rechargeable batteries

**Nikobus user manual:** [www.niko.be](http://www.niko.be)

## INFRARED SIGNAL DISTRIBUTION - GENERAL

The use of an infrared remote control is usually confined to the space in which the IR receivers or appliances are installed. However, if you wish to use the infrared remote control from another room, you can use Niko's IR signal distribution system via wiring. This simple and easy to use set-up includes at least one infrared receiver, one IR connection block with power supply and a number of IR transmitters equal to the number of hi-fi appliances you wish to control.

### MINI FLUSH MOUNTING IR RECEIVER

**Reference:** 16-720

**Pack:** 1

**Dimensions:** Dia: 12mm x L 71mm

**Cable length:** 2,43m

**Installation example 4:** p. 21

Available January 2004

This infrared receiver can easily be built into e.g. a wooden wall or ceiling. Only a round finishing washer is visible. Including 2 finishing washers (white and black).

- 4 pole 3,5mm connection jack
- Built-in IR activating LED and status LED
- Suppression of surrounding light for a better reception of IR commands
- To be used with IR connection block (16-724) and the IR transmitters (16-726 or 16-727)

### MINI SURFACE MOUNTING IR RECEIVER

**Reference:** 16-721 (white), 16-722 (black)

**Pack:** 1

**Dimensions:** H 14mm x W 66mm x D 14,2mm

**Cable length:** 2,43m

**Installation example 4:** p. 21

Available January 2004

This infrared receiver can be glued onto a wall or piece of furniture

- 4 pole 3,5mm connection jack
- Built-in IR activating LED and status LED
- Suppression of surrounding light for a better reception of IR commands
- To be used with IR connection block (16-724) and the IR transmitters (16-726 or 16-727)

### BOOKSHELF IR RECEIVER

**Reference:** 16-723

**Pack:** 1

**Dimensions:** H 29mm x W 80mm x D 27mm

**Cable length:** 2,43m

**Installation example 4:** p. 21

Available January 2004

This attractive IR receiver can be placed on top of a cupboard or bookshelf and it can a.o. be used to operate your audio and video appliances if these are placed in a closed closet.

- 4 pole 3,5mm connection jack
- Built-in IR activating LED and status LED
- Suppression of surrounding light for a better reception of IR commands
- To be used with IR connection block (16-724) and the IR transmitters (16-726 or 16-727)

### IR CONNECTION BLOCK

**Reference:** 16-724

**Pack:** 1

**Dimensions:** H 21,5mm x W 81mm x D 54 mm

**Installation example 4:** p. 21

Available January 2004

This central connection block is best placed together with audio video (AV) equipment which needs to be controlled and is supplied with the necessary connections for supply, IR receivers and the mini IR transmitters.

- Active circuit for control of the mini IR transmitters or IR radiator
- Connection for the IR receivers via 4 terminals
- 4 pole 3,5mm mini jack for connection of one IR receiver
- connection for supply via DC jack (supply 06-725)
- 5-24 V DC status jack
- Dip switch for settings of type mini IR transmitter and network termination

### POWER SUPPLY FOR IR CONNECTION BLOCK

**Reference:** 16-725

**Pack:** 1

Available January 2004

Stabilised power supply 12V DC/700mA for the IR connection block and the mini IR receivers

**Installation example 4:** p. 21

## SINGLE MINI IR TRANSMITTER WITH LED

Reference: 16-726

Pack: 1

Dimensions IR transmitter:

H 13,5 mm x W 11,8mm x D 7,1mm

Cable length: 2,43m

Installation example 4: p. 21

This mini IR transmitter is glued to the IR receiver of an AV appliance with its unique self-adhesive holder. In case of service of the AV equipment, you only need to pull out the mini IR transmitter without having to disconnect the wiring.

- Built-in LED flashes when sending IR signals
- Unique holder to keep the mini IR transmitter in its place and to be able to remove it easily
- Supplied with a 3,5mm mini jack
- To be used with IR connection block (16-724) and the IR receivers

## DOUBLE MINI IR TRANSMITTER WITH LED

Reference: 16-727

Pack: 1

Dimensions IR transmitter:

H 13,5 mm x W 11,8mm x D 7,1mm

Cable length: 2,43m

Installation example 4: p. 21

One connection is equipped with 2 mini IR transmitters to control 2 AV appliances.

They are glued to the IR receiver of an AV appliance with their unique self-adhesive holder. In case of service of the AV equipment, you only need to pull out the mini IR transmitter without having to disconnect the wiring.

- Built-in LED flashes when sending IR signals
- Unique holder to keep the mini IR transmitter in its place and to be able to remove it easily
- Supplied with a 3,5mm mini jack
- To be used with IR connection block (16-724) and the IR receivers

## IR RADIATOR

Reference: 16-728

Pack: 1

Dimensions: H 13mm x W 76mm x D 8mm

Cable length: 2,43m

Installation example 4: p. 21

This infrared radiator contains 2 strong IR transmitters. It can e.g. be mounted in a cupboard facing the AV equipment which has to be controlled.

- Supplied with a 3,5mm mini jack
- To be used with IR connection block (16-724) and the IR receivers

## CONNECTION PRINT 4 CIRCUIT JACK

Reference: 16-729

Pack: 1

Dimensions: H 17,2mm x W 38,2mm x D 25,5mm

Installation example 4: p. 21

Use this connection print as interface between the 4 pole mini jack of the IR receivers and the 4 wires of the infrared circuit.

## IR TRANSMITTER AND RECEIVER KIT

Reference: 16-732

This kit contains all items to control your AV equipment with one single IR receiver. It can be expanded with extra IR receivers if so desired.

- 1 x 16-723 Bookshelf IR receiver
- 1 x 16-724 IR connection block
- 1 x 16-725 Power supply block
- 4 x 16-726 Single mini IR transmitter

### Installation example 1: A44 or A88 with universal remote control

By means of a universal remote control (optional), all zones can be operated. In this setting, you can only control the installation from the room where the A44 or A88 is installed.

### Installation example 2: A44 with Audio-Link (05-205) and 4-fold and 8-fold push-button

By means of Niko's Audio-Link (05-205) and a 4-fold and 8-fold push-button, music can be controlled in the zone where the push-button is installed (e.g. source selection and volume adjustment).

## Installation example 3: Installation with wired push-buttons and wireless remote control

By using Niko's hand held remote control (05-310-02) and Niko's RF-interface (05-300), 4 audio zones can be operated without wiring.

## Installation example 4: Controlling with an infrared connection

By using Niko's mini IR transmitters and receivers, the A44, A88 as well as the hi-fi set can be operated from another zone with an infrared remote control.

Mounting push-buttons
