To subscribe, contact XM on the web at www.xmradio.com or by phone at 800.XMRADIO (967.2346).

XM Satellite Radio available only in the Continental United States.

Russound®

ST2 Smart Tuner

Dual XM Satellite Tuner, Dual AM/FM or AM/FM with XM Satellite Tuner

Connect to a larger world

Enjoy listening
to the radio again.

All of you.

Anywhere in the house.

One tuner. Two tunes. *Now everyone is happy.*

Two radios in one

Radio. It lifts your spirits, informs you and makes you laugh. With an ST2 Smart Tuner from Russound you can enjoy your music, news or sports from anywhere in the house. Listen to your favorite channel in one room, while your kids enjoy a favorite station in another. Hip Hop in the playroom, and oldies in the kitchen – it's two radios in one.

Three models to choose from

Select an ST2 dual tuner to match your preferences and musical style. Available in three models: a dual XM tuner, a dual AM/FM tuner or a dual tuner with AM/FM and XM. Each ST2 Smart Tuner offers something for everyone.

All tuners share one set of controls and display, but each runs independently, allowing you to receive two different broadcasts at the same time. For instance, AM in one room, FM in another. Alternatively, you can choose the dual XM model or XM with AM/FM and listen to XM channels throughout your multiroom system. (XM Satellite Radio requires a subscription.)

The ST2 Smart tuner lets you listen to different stations in different rooms. Hip hop in the playroom, oldies in the kitchen. If the ST2 tuner is using an RNET CAV6.6 amplifier controller system, the ST2 can be controlled through any RNET keypad such as the UNO-S2.

Crisp, clean digital sound

The growth of XM has been explosive. It offers over 150 channels of music, news, sports, comedy, talk and entertainment. Its coast-to-coast coverage, digital quality sound and commercial-free music channels deliver diversity and listening choices to XM radio subscribers.

With the AM/FM tuner, you get local broadcast stations. Anyone can listen to different stations in different rooms.

Whether you choose AM/FM or XM, the choice is yours. What you get is radio like you've never heard before.

RNET® offers more entertainment

The ST2 gives you even greater capabilities when used with Russound's RNET components such as the award-winning CAV6.6 controller amplifier and the UNO family of Smart Keypads. You will see station frequency and custom bank and preset names. With the ST2-XM tuner and the UNO Smart Keypad, artist and title information is displayed at the beginning of each song or by touching a button.

The Russound philosophy

Russound has been a pioneer in the multiroom audio industry since 1967. That is why Russound is recognized as a preferred source for audio equipment worldwide. The products' quality, reliability and design continue to serve as a user-friendly line of amplifiers, keypads, loudspeakers, media servers, multizone source equipment and more. All multiroom solutions are built to high standards and designed with the unique consideration of making products that are enjoyable and a pleasure to live with.
