### The Russound philosophy

Since 1967, innovation, quality and reliability have been the core of the Russound product tradition. Today, Russound offers everything for enjoying multiroom audio-video in your home. All audio-video distributed solutions are built to high standards and designed with the unique consideration of making products that are a pleasure to live with and enjoy.

**NOTE: The following minimum firmware revisions are required for using the UNO-TS2 with Russound RNET components**

Component Model	Revision	Component Model	Revision
CAV6.6 Rev 3	2.02.16 or higher	ST2 Dual Tuner	3.00.10 or higher
CAV6.6 Rev 4	3.01.10 or higher	ST2-XM (ST2 Chassis)	3.00.10 or higher
CAM6.6	1.01.05 or higher	ST2-XM (XM Module)	2.00.05 or higher
CAM Internal AM/FM Tuner	1.01.01 or higher	SMS3 Media Server	2.00.07 or higher
CAM Internal XM Module	2.00.05 or higher		

RNET is a proprietary platform that allows Russound components to communicate with each other.

### Innovative

- Eight "hard-key" buttons for instant access to key functions
- Super-compact design fits standard, dual-gang electrical wallbox

### Ergonomic

- High-resolution 3.75-inch (diagonal) touchscreen is easy to read and operate
- Customizable "soft-keys" deliver simple, yet powerful one-touch command of all system components
- Real-time displays show what's playing, with volume level and individualized playlist info right on the touchscreen

### Stylish

- Flush, wall-mounted color display is elegant, unobtrusive, and easily integrated into any décor
- Choice of five designer colors for installation bezel: white, almond, bone, brown, and black

# UNO-TS2 Smart Color Touchscreen

Complete control  
of your multiroom  
entertainment system

All you need to know is Russound

The UNO-TS2 brings one-touch access to your favorite discs, radio stations, DVD movies – even MP3 playlists. Simply browse, choose, control, and enjoy.

### Set the mood

You walk in your house, press the play button and relaxation takes over or turn up the volume and enjoy your own concert, right in the living room. That's the simplicity of the UNO-TS2, it's your choice. Its award-winning technology delivers direct, uncomplicated control of your multiroom system, via the full color touchscreen interface that's easy to read and operate — the very first time you use it.

### Amazing feats, performed with RNET®

The magic behind the UNO-TS2 is RNET, Russound's powerful communications system. It lets the UNO-TS2 (and other RNET keypads and remotes) have two-way interaction with compatible Russound multiroom components, including the CAV6.6 Controller/Amplifier and CAM6.6 Receiver, SMS3 Smart Media Server, and ST2 Dual Tuner. What this means for you is valuable system information displayed in an attractive, readable display. For your home it means instant access to your audio and video components without the clutter and confusion of stacks of electronic equipment.

### Let the show begin

Informative, full-color displays show what's playing: channel, artist, title and more appear right on the touchscreen. On-screen soft-keys offer up just the functions you need in clear, straightforward system menus. There are smart, ergonomic features, like the eight "hard-key" buttons flanking the UNO-TS2 with always-available control of critical modes and functions. And useful ones, like the on-board infrared "eye" for full-system remote control.

*The UNO-TS2 color touchscreen controls Russound RNET multiroom components, and through them, virtually any A/V source or ancillary gear, with intuitive, ergonomic ease.*

# The UNO-TS2 color-graphical interface

The main display shows what's playing at all times, including song title (where available), source and zone status, and even a bar graph of the current volume setting.

Two "favorites" soft-keys each recall a chosen station, disc, or media-server stream, complete with all room settings. And it's easy: Tune in or cue up the music, adjust volume, and simply press-and-hold F1 or F2.

Options include room settings like bass and treble, and modes such as "Do Not Disturb" (source and zone "lockout"). The Options page is also where you access touchpad settings such as screen contrast.

The eight "hard keys" arrayed on either side of the UNO-TS2's screen are always on and always ready with basic functions including volume control, play/pause, and channel/track up/down.

Six "source" soft-keys can select not only a specific component, but also the media server program or disc-changer set you want. Through Russound multiroom controllers, the UNO-TS2 operates virtually any source component, as well as Russound's own ST2 dual-tuner (AM/FM/XM), and SMS3 Smart Media Server. (ST2-XM2 requires a subscription to XM Radio)

## Source options

### Media server

The UNO-TS2 brings all the power and ease of Russound's SMS3 media server to any room. It shows the current selection in ample detail, while additional screens give full control over selecting streams, themes, and genres.

### Music

When used with the SMS3 Media Server the user can make requests any way they want.

### AM/FM or XM tuner

With Russound's unique ST2 tuner, enjoy AM, FM, and all of XM satellite radio's variety and quality, at the tip of a finger. Store up to 36 AM, FM, or XM station presets — simply press and hold your favorite station displays on the soft-key.

### CD/DVD changer

The UNO-TS2 extends complete control of your CD or DVD changer or player to whatever room you choose — with full play/pause/skip, search, and programming functions instantly at hand.
